Feedback Comments:

“ I just wanted to let Webtechies Team know how much I appreciated them and I really thank Webtechies for completing my project. Even though we were about a month late,it was due to a lot of things that we had to change the way they work,besides,it's better to be late and function properly than to rush the project inappropriately. There won't be Elance without Webtechies. I have few more projects on file and I am most definitely going to continue our relationship,so you're still going to hear from me regarding new projects soon. Thanks again for all your cooperation and endless hours of coding. God bless you guys(Webtechies).Check the site they did to see how awesome of a job they did, <http://www.shipbyowner.com> ”

May 31, 2010 | \$3,350 | Website Design | Completed | [Job Details](#)

Feedback Comments:

“WebTechies has developed a full website project: from design to coding. The project quality is very good. However, there were many delays at the beginning of the project for unknown reasons. We are now in the maintenance phase. Now is time for bug-fixing and polishing some of the features. Overall I'm satisfied with WebTechies and will recommend it. I would advise to make them aware of your schedule constrains before starting a new project.”

Apr 2, 2010 | \$6,245 | Website Design | Completed | [Job Details](#)

Feedback Comments:

“We are not quite done with our project so it is difficult at this time to give them a final evaluation. So far they have been very responsive and have stayed within the predetermined financial guidelines. We have had a little bit of a learning curve on how to communicate changes needed to be made on our web design pages, but they seem willing to work through this with us. I will know more when we are closer to finishing the site.”

Feedback Comments:

“Webtechies delivered exactly what I requested and at a very low cost, which was great value. The project went significantly over the deadline in terms of timing, but I think this was due to both of us having made the mistake of underestimating just how difficult the project would be (there is no similar website to copy, and it is completely original). Despite the project slippage, Webtechies kept to the agreed fixed fee which

was appreciated. Thanks”

Feedback Comments:

“Today is the last chance I have to leave feedback and I don't want to miss the opportunity to tell the Elance community Webtechies are wizards of code. They are definitively experts in the matter. Our project has still some final details to be finished and I am confident Webtechies will deliver a satisfactory final product. Thanks webtechies for the great efforts put into this project.”

Apr 4, 2009 | \$2,225 | Website Design | Completed | [Job Details](#)

Feedback Comments:

“I chose Webtechies because they called me and spoke great english, and were very responsive in the communication. They got the first 2 phases of the site done in record time (9 Days), and they really went above the original project and put more in than was expected. It turned out great. The site works great. I would give them a 5 out of 5, except there were a couple of weeks at the end when the response time slowed down. I will absolutely use them again. These guys know their stuff and give great service.”

Feb 16, 2009 | \$1,200 | Web Programming | Completed | [Job Details](#)

Feedback Comments:

“Provider was easy to work with, via PMB and accessible on chat for a significant portion of the day. Provider was flexible when project scope changes arose. Despite some changes, work proceeded almost exactly on schedule for a four-week project. There were some points of confusion regarding which person from the Provider was the single point of contact for the project. Although response time was almost always prompt, it would have been nice to get more proactive status updates or clarifying questions, just for peace of mind that everything was proceeding according to plan. End result of project was a product that was very useful and met expectations in full. Will definitely work with the Provider again.”

Feedback Comments:

“These guys were great. They turned out an amazing design ahead of schedule and under budget. Although the design was right on the money, I was expecting different 'functionality' if you will, not just a design. This was my fault as I should have done my homework a bit better. I would definately consider doing business with them again however.”

Feedback Comments:

“Web Techies, are wizards of software creation, and go the extra mile. There work is brilliant and understanding and willingness to make it better can not be questioned. This is the second project they have done for me. Both times completely professional and easy to work with. They are very prompt in email replies and make bulletproof software. 10/10 Thanks the team at Web Techies.”
— [Client Info](#)

Freelancer Response:

“First of all we would like to thank Steve for such a nice feedback. Not entire credit is ours in being able to complete the project but it was his cooperation which played a very important role as well. He was available to help and check the work as it was required any time of the day and his timely responses and feedbacks and effective communications made it work for us. This project was a perfect example of the fact that if buyer responds quickly with feedback and help with proper communication the project comes out with desired results. Best Regards WebTechies!!”

Sep 11, 2008 | \$1,000 | Web Programming | Completed | [Job Details](#)

Feedback Comments:

“I needed to develop a semi-functional website prototype in a 3-day time frame, and WebTechies did it. I've outsourced to other developers in the past, and no one so far could match WebTechies. Design was superior and programming was precisely as specified. Communication with them was very easy - English skills are perfect and phone conversations were easy to do and at almost any time. I also received thorough documentation relating to the website, followed by assistance in deploying the final product. WebTechies are enjoyable to work with and have been very flexible with regards to programming language used, time frame, etc. Feel free to contact me if you have any specific questions relating to their service.”

— Client

Freelancer Response:

“First of all we would like to thank Alex for a wonderful feedback. Not entire credit is ours in being able to complete the project on time but it was his cooperation which played a very important role as well. He was available to help and check the work as it was required any time of the day and his timely responses and feedbacks and effective communications made it work for us. This project was a perfect example of the fact that if buyer responds quickly with feedback and help with proper communication the project can be completed in a significantly lesser period of time. Best Regards WebTechies ”

Quality Expertise Cost Schedule Response Professional
Feedback Comments:
"I am very, very, very fortunate to have found this company. The team was very helpful and patient in making me my perfect e-commerce website. They literally did everything I asked them to and communicated with me very, very well. The price I paid for their service was a bargain considering the end result was perfect. The company did a whole lot of little things to make my website better without me even asking, such as automated newsletters, quantity control, personalized accounts, etc. If you are looking to build an e-commerce website or have an e-commerce website that needs improvements, this is a great choice. I really can't recommend this company enough. I will definitely use this company again in the future for other tasks because I know I will get my money's worth and a whole lot more."

“I want to thank WebTechies a lot for coming up with an awesome website for my project. I know I have been a tough buyer and very unreasonable some times. I have also asked for multiple changes many times. I really appreciate their efforts to make all the changes in quick time. I was initially skeptical since they were experts in data scraping and spyware removal. I was wondering if they would be proficient in developing a website using PHP and MySQL. But they went above and beyond and exceeded all my expectations. They proved that they have a wide array of technological skills to be able to handle any type of project. They have a very good design team that came up with a nice and clean design for my website. I was amazed by their courteous and prompt responses during all our communications. They seem to be very sincere, hardworking and reasonable. I definitely hope to use their services again in the future. Also, I will surely recommend them to any elance buyer looking for a quality service provider with expertise in multiple areas. Keep it up WebTechies! You guys rock!”

“This is the second job I have given to WebTechies and it is the second time I have been more than impressed with the quality of work and their dedication to their clients. WebTechies treat you with respect and are more than happy to listen to ideas that you have. Their professionalism is by far, second to none. Yet again they gave me a final product that was better than I had asked for! I will DEFINATELY be using WebTechies for all my work. They are, without a doubt, the best providers on Elance. Thanks guys!”

Jul 21, 2008 | \$4,000 | Software Application | Completed | [Job Details](#) ▾

Feedback Comments:

“What can I say! WebTechies and his team made this project an absolute pleasure from start to finish. I have had many projects done for me (from other areas) but none have been as professionally handled as this one. From the outset I was dealt with in an extremely timely and polite manner. All of my questions and queries were answered and dealt with immediately (believe me, how they put up with me is fantastic). I had all the support I needed right through to the end of the project and beyond. The work that they produced surpassed all of my expectations. I asked for a system that I knew was difficult to make but they created it and made it look better than I wanted. I can not express how happy I am with the finished product. In summery, if you want any work done, choose this provider. You will NOT regret it. I for one will definately be using them for ALL work I want done in the future. Thanks WebTechies & Team. You were simply excellent!”

“What can I say that I haven"t already said. Please read my comments/ratings in my many past projects with Tarun from eSoftwareBank. I am still impressed. I still have more to do and will continue to place closed bids on eLance and invite Tarun from eSoftwareBank only. Sincerely, Steve Funk EchoAlert.com”

Feedback Comments:

“Very talented programmers. This was a complex project, which ran into a number of roadblocks, and eSoftwareBank always came up with solutions and alternatives. Program does the job we needed it to do, and at the agreed upon cost. Always pleasant and professional to deal with. Would recommend this provider.”

“This completes my 3rd. project with Tarun! This was as successful as the last 2. I can only say good things about this provider. Great communication. Great work ethics. Completed on time, there were no excuses. I'm putting investment money together for the next project...like the last project Tarun was the only provider I allowed to bid. Same with this next project. I am not interested in having anyone else work with me. Sincerely, Stephen Funk”

“Tarun has AGAIN exceeded my expectations. This is the second time I have used him and both times he is done on time. Everything works as it should. He has taken the time on both projects to research the

Professional

project before he bids. This is a crucial step that most providers forget in the rush to bid on a project. If he says he can do it. HE CAN DO IT. This was a complicated project where 2 programmers have failed in the past. He finished it in less time with no bugs. He is also a great communicator. He never leaves you wondering what he is doing. I have 2 more projects lined up that I am only inviting Tarun to bid. I can recommend him with out hesitation. Sincerely, Stephen Funk”

Freelancer Feedback Comments for Client:

“Thank a lot Stephen. It has been our pleasure to get the opportunity to work on your project. It was a challenging assignment and was a very good experience for our team. You have got a very good grasp of the technicalities, which really helped us throughout the project. We look forward to work with you again. Thanks, Tarun”

Feedback Comments:

“eSoftwareBank & Tarun: Any one who is looking to get their money worth for their project must choose eSoftwareBank ! Tarun and his team are outstanding they communicated very effectively during this project and responded to our comments and adjustments during development. Very good communication only ask a few question which show that they have studied the original project very well (unlike many providers here they just bid and promise but not being able to deliver) Well done eSoftwareBank. Sami Kohen www.Greencardusa.cc ”

Feedback Comments:

“eSoftwareBank quickly demonstrated their understanding of the requirement and responded extremely quickly and comprehensively throughout the entire process. Communications were succinct and prompt. We requested certain changes during the development process and these were accomodated with equal professionalism. We would highly recommend eSoftwareBank and have already engaged them to complete another project. We are so confident in their abilities and attitude that unless they indicate an inability to fulfill a requirement, we plan to save our time and deal with them on a closed-bid basis in future.”

Aug 2, 2002 | \$150 | Software Application | Completed | [Job Details](#)

Feedback Comments:

“I cannot say enough about Tarun. I needed something that everyone said couldn't be done the way I needed it. He not only finished EXACTLY what I needed, but he had it done the same day that I awarded him the project. The project did not need any rewrites or changes it worked as expected the first time he sent it. I have worked with several programmers on elance and Tarun is by far the best all around provider. Communicates well and timely. Completes what he says he is going to do. AND when he says he is going to have it done by. I am already preparing the next thing to send to him. I cannot recommend him more. Thank you. Sincerely, Steve Funk”
